THOUGHTFUL SOLUTIONS

ABOUT PURIWASH

A mobile foot operated hand wash station that can be placed in any premises serving as a hands-free, hand washing kiosk eliminating the need to visit restrooms or toilets only to wash hands.

WHY PURIWASH ?

One can control hygiene in a private place but being in a public space brings many complex challenges for this simple task. Using sanitizers is convenient, but they are of limited help if your hands are dirty or greasy.

The best and most effective method is to wash your hands with soap and water, which renders absolute cleanliness. But hand washing facility is not always available in public places and visiting the restroom just to wash hands may not be convenient.
